

Amendments to the Claims:

1. (Previously presented): A computer-aided method to selectively display a pre-determined set of contents for a specific class of devices, the method comprising the steps of:

generating an image of a pre-determined rendition of the set of contents;

identifying a section in the contents based on a preference of a user; *Am d*

re-formatting the identified section to generate a new rendition including the identified section,

wherein the new rendition is formatted based upon a characteristic of the specific class of devices and the preference of the user; and

such that the new rendition can be displayed on the specific class of devices.

2. (Previously presented): A computer-aided method as recited in claim 1 wherein the user is selected from the group of an end-user viewing the new rendition and the provider of the set of contents.

3. (Previously presented): A computer-aided apparatus to selectively display a pre-determined set of contents for a specific class of devices, the apparatus comprising:

an image generator configured to generate an image of a pre-determined rendition of the set of contents;

a section identifier configured to identify a section in the contents based on a preference of a user;

a section manipulator configured to re-format the identified section to generate a new rendition including the identified section, wherein the new rendition is formatted based upon a characteristic of the specific class of devices and the preference of the user; and

such that the new rendition can be displayed on the specific class of devices.

4. (Original): A computer-aided apparatus as recited in claim 3 wherein the user is selected from the group of an end-user viewing the new rendition and the provider of the set of contents.
